

# ENHANCED DIGESTIBILITY

MAKES FEED COSTS  
EASIER TO STOMACH

## Nutrivail™ Feed Technologies

Pioneer® brand Nutrivail™ feed technologies help improve nutrient availability in cattle. Nutrivail feed technologies expand the elite lineup of forage solutions from DuPont Pioneer — and, when combined with unmatched expertise and unique services, help us deliver Integrated Feed Solutions.

The first Pioneer products with Nutrivail feed technology help improve fiber digestibility, reducing the need for supplemental energy and protein sources in the ration and dramatically improving the value of feed.

### Improve fiber digestibility.

Nutrivail feed technologies allow more nutritional value, which helps lower feed costs and boost the bottom line. Pioneer brand Nutrivail feed technologies 11CFT, 11AFT and 11GFT help improve fiber digestibility when applied to your corn silage, haylage or grass/cereal silage at harvest.

### Maximize ration efficiency.

Gains in efficiency allow you to have higher forage inclusion rates and maximize the value of your feed investment. The benefits of this exclusive technology include:

- Improved ration efficiency and consistency
- Increased nutrient availability
- Reduced investment in supplemental protein and energy in the diet

### Increase feed optimization.

This feed technology helps improve feed inventory by:

- Efficiently aiding fermentation
- Minimizing dry matter loss
- Improving aerobic stability
- Extending bunklife

### NUTRIVAIL FEED TECHNOLOGY FIBER DIGESTIBILITY

### Put it to work for you.

Talk to your local Pioneer sales representative or DuPont Pioneer livestock specialist or visit [pioneer.com/nutrivail](http://pioneer.com/nutrivail) to learn more about Nutrivail feed technologies with fiber digestibility.

This is just the beginning. More advancements in feed technology are on the way.
